

The HICES Earthshot Prize

"There can be no greater legacy than giving young people the tools they need to save our planet". Sir David Attenborough

The Earthshot Prize is an initiative of HRH Prince William and Sir David Attenborough. It was designed to find and grow solutions that will repair our planet in this decade. The Earthshot Prize is the most prestigious global environmental prize in history. The **HICES Earthshot Prize** is a student led version of the Earthshot Prize developed by HICES teachers. Teachers have collaboratively designed a program to guide and inspire students to come up with solutions targeting the five Earthshots.

WASTE FREE
WORLD

CLEAN OUR
AIR

THE HICES Earthshot Prize requires students to work collaboratively and creatively, incorporating problem solving, design, innovative and leadership skills. The goal is to encourage students to generate ideas to solve environmental problems within their own school, their local community or globally. We are delighted that Oxley College will provide students with the opportunity to take part in the **HICES Earthshot Prize**. The program is open to students in Years 7 and 8 and further information can be found at [Generation Earthshot - HICES Earthshot Prize Program](#). A link was sent to all students in Years 7&8 so if your child is interested in this initiative, please encourage them to complete the expression of interest form. Ruth Shedden
