

Bowral Sewage Treatment Plant Upgrade

Haslin Constructions

Haslin Constructions is a locally-owned, family-run Construction and Engineering company specialising in the delivery of complex infrastructure.

For thirty years, Haslin has been heavily invested in NSW's infrastructure legacy, delivering \$1.5 Billion in infrastructure across some 300 projects.

These multi-disciplinary projects span the Transport, Wastewater, Public Domain and Energy sectors and were all realised collaboratively, hand-in-hand with a diverse range of clients.

Wingecarribee Shire Council has teamed up with Haslin to undertake the Bowral Sewage treatment Plant (STP) Upgrade.

Upcoming works

Our construction works have commenced and will conclude in 2025.

Haslin will be undertaking temporary road upgrade works commencing in approximately 2 weeks. The works will include:

- Pavement widening of the Northern side of Burradoo Road. This will extend for approximately 60m.
- A right hand turning bay into the STP so that public traffic flow is uninterrupted by constructions vehicles.
- Line marking to delineate the east-bound lane, west-bound lane and new turning lane.

Oxley College, the local bus companies and both Burradoo Road and Yean Street will be impacted by minor temporary road changes and traffic control.

Please contact the construction response line below with any questions you might have.

Thank you for your patience, and for using caution around our areas of work.
